Address

No. D-341, Nweni 7th Street, North
Okkalapa Township, Yangon, Myanmar

Personal Info

DOB	27.8.1998
Passport	MH xxxxxx
Marital status	Single
Nationality	Myanmar
Expected Salary	SGD 2900 (Nego)

Education

2023
Diploma in Level 5 (NCC)
Twinkle College

2024
Bachelor of Engineering in IT
Technological University (Hmawbi)

Language

- English (Fluent)
- Burmese (Native)
- Chinese (Learning)

Profile

I am a design enthusiast and front-end web developer with **three years** of experience creating responsive websites and web applications. I have worked in both software-house environments and structured enterprise development teams, gaining hands-on experience in professional software development workflows. During my career, I collaborated closely with Java and C#/.NET teams, learning to integrate and work effectively with RESTful APIs. I thrive in organized workflows, using tools like Jira and Confluence, and have experience collaborating with DevOps teams to streamline deployment operations through CI/CD pipelines.

Experience

2024 - 2025 (Present)

Ayeyarwaddy Farmers Development Bank (A bank)

Frontend Developer (React JS, Next JS)

Projects

- Consumer Portal (React JS class-based component)
- Reporting Portal (Remix)
- A Insurance Webview inside A+Wallet (Next JS, Flutter)
- A Insurance Portal (React JS)
- Marketing Portal (React JS)

Responsibilities

- Participate in daily stand-ups, sprint planning, sprint reviews, and retrospectives as part of an **Agile/Scrum** team.
- Collaborated with PO and BA to deliver user stories, managed tasks using **Jira**, and maintained documentation in **Confluence** within an Agile team.
- Implement UI/UX designs according to banking standards, accessibility guidelines, and responsive design best practices.
- Develop and maintain secure, scalable, and responsive web applications using React.js for banking and financial systems.
- Work closely under the guidance of a Team Lead to deliver features according to project timelines and technical standards.
- Collaborate with backend teams (Java / .NET) to integrate **RESTful APIs** and ensure accurate data handling.
- Ensure compliance with banking security policies, including authentication, authorization, and secure data handling.
- Write clean, reusable, and well-documented code, following team coding standards and best practices.
- Coordinate with DevOps teams for **CI/CD** pipelines, build processes, and deployment support.
- Work with QA and testing teams to support UAT, bug verification, and release readiness.
- Fix bugs, optimize performance, and improve application stability and user experience (mostly for back office portal users).
- Maintain documentation in tools like Confluence and track tasks and progress using Jira.

Expertise

- Responsive Design
- Component-Based Architecture
- UI/UX
- Performance Optimization
- RESTful API Integration
- Data Handling and Validation

Proficiency

- HTML5, CSS3, Tailwind
- JavaScript (ES6+) / TypeScript
- React.js
- State Management (Redux / Redux Toolkit / Zustand)
- Yup / Zod
- Next.js (SSR, SSG)
- Shadcn / MUI
- NodeJS
- ExpressJS
- NestJS

Summary

Highly creative and motivated Front-End Developer with 3 years of hands-on experience in building responsive websites and web applications using React.js and Next.js. Strong understanding of component-based architecture, API integration, and modern state management, ensuring features are implemented efficiently and with high quality. Experienced in Agile workflows, collaborating with cross-functional teams, and using tools like Jira and Confluence. Seeking an opportunity to broaden my technical expertise and contribute to innovative web development projects while continuing to grow as a front-end professional.

- Provide night overtime (OT) support during bank-wide software deployments, releases, and production rollouts.
- Coordinate with DevOps, QA, and backend teams to ensure smooth deployment and minimal service disruption.
- Monitor deployment processes, perform post-deployment verification, and support production issue resolution.
- Use Microsoft Teams for team communication, meetings, screen sharing, and cross-functional collaboration across the software development lifecycle.

2023 - 2024

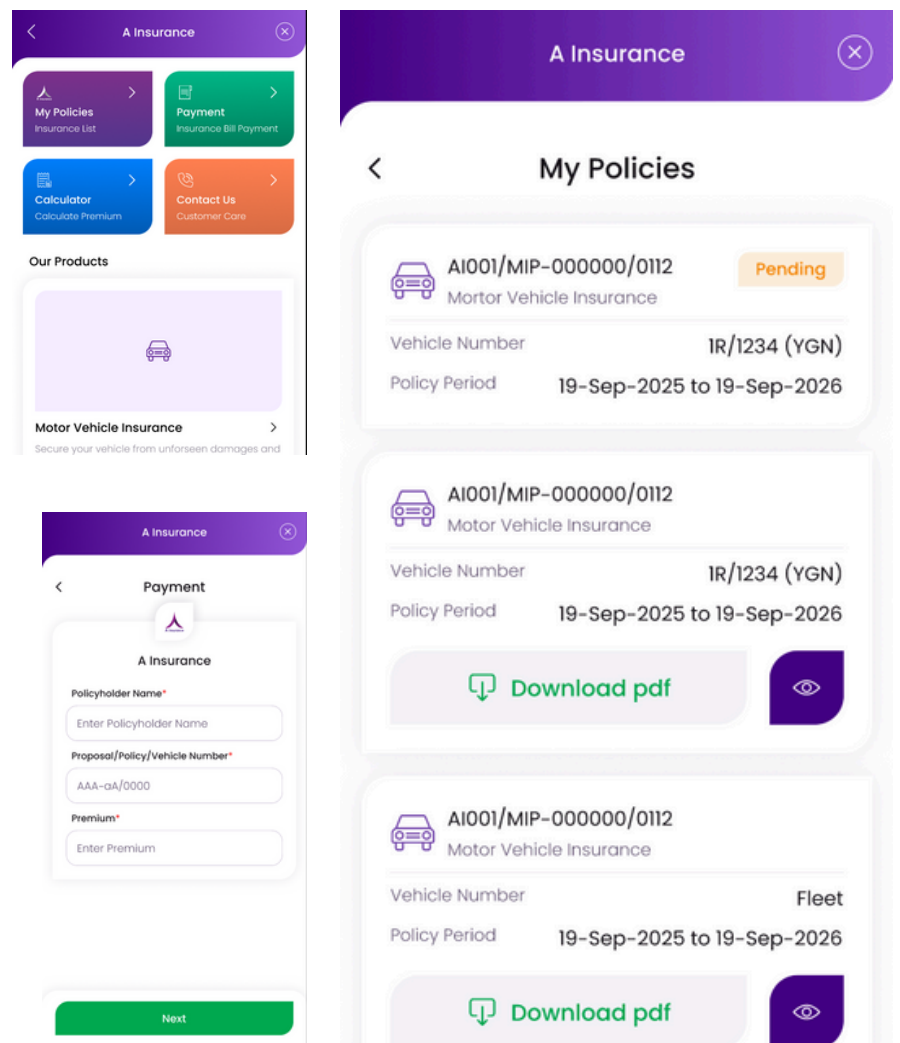

Twinkle College

Frontend Developer (React JS)

Responsibilities

- Participate in weekly meeting, sprint planning, sprint reviews, and retrospectives as part of an Agile team.
- Implement UI/UX designs according to product owner and UI/UX designer.
- Develop and maintain secure, scalable, and responsive web admin portal using React.js for various applications.
- Collaborate with backend teams (PHP/Nest JS) to integrate RESTful APIs and ensure accurate data handling and validation .
- Write clean, reusable, testable code using team's prefer structure.
